## **Tumi Resources Expands the Zone of Interest and Completes a Grid Geochemical Sampling Program at the La Trini Silver-Gold Prospect, Jalisco, Mexico**

**Vancouver, Canada – Tumi Resources Limited (the “Company”) (TSXv-TM; OTCBB – TUMIF; Frankfurt - TUY).** Mr. David Henstridge, President, is pleased to announce the completion of a grid and geochemical survey centered on La Trini silver/gold prospect in Jalisco, Mexico.

La Trini zone occurs within a gently northerly-dipping silicified rhyolite containing disseminated pyrite and argentite. Recent mapping has recorded numerous pits and mineralized zones, and all accessible mineralized exposures were channel sampled. As reported by the Company on May 24, 2005, the channel sampling gave very positive surface results (up to 12.3 metres averaging 3 g/t gold and 154 g/t silver) over a strike distance of 330 metres. In order to determine the extent of the mineralization, a geochemical survey has been completed on a grid measuring about 1,400 metres by 500 metres and centered on La Trini. A total of 383 samples were taken at 25 metre intervals along the grid. The samples were prepared by GM LACME Laboratory, Guadalajara, Mexico, and have been submitted for analyses at IPL International Plasma Labs in Vancouver, Canada. This geochemical survey will help in determining the extent of silver-gold mineralization and aid in designing an initial drill program.

The qualified person for the La Trini project, David Henstridge, a Fellow of the Australian Institute of Mining and Metallurgy and a Member of the Australian Institute of Geoscientists, has visited the La Trini project area to see the sample sites and has verified the contents of this news release.

On behalf of the Board,

**"David Henstridge"**

David Henstridge, President & CEO

**Forward Looking Statements**

This Company Press Release contains certain "forward-looking" statements and information relating to the Company that are based on the beliefs of the Company's management as well as assumptions made by and information currently available to the Company's management. Such statements reflect the current risks, uncertainties and assumptions related to certain factors including, without limitations, competitive factors, general economic conditions, customer relations, relationships with vendors and strategic partners, the interest rate environment, governmental regulation and supervision, seasonality, technological change, changes in industry practices, and one-time events. Should any one or more of these risks or uncertainties materialize, or should any underlying assumptions prove incorrect, actual results may vary materially from those described herein. Neither the TSX Venture Exchange nor the Frankfurt Deutsche Börse have reviewed the information contained herein, and, therefore, do not accept responsibility for the adequacy or the accuracy of this release.
