News Release

May 24, 2005

Surface Channel Sampling Results Very Encouraging at the La Trini Silver-Gold Prospect, Jalisco, Mexico

Results Include: 12.3 m averaging 3 g/t gold and 154 g/t silver and 6.25m averaging 8.7 g/t gold and 179 g/t silver

Vancouver, Canada – Tumi Resources Limited (TSXv-TM; OTCBB – TUMIF; Frankfurt - TUY). Mr. David Henstridge, President, is pleased to announce the results of the surface channel sampling program at the La Trini silver-gold prospect, Jalisco, Mexico.

La Trini outcrops within a gently northerly-dipping silicified rhyolite containing disseminated pyrite and argentite. Recent mapping within the outcrop area has recorded numerous pits and mineralized zones and all accessible mineralized exposures have been channel sampled along a strike distance of about 330 metres. Using a cut-off grade of 30 g/t silver, results of this surface channel sampling are listed in the table below.

SURFACE CHANNEL SAMPLING AT LA TRINI

Trench Coordinate (E)	Sample Length (m)	Au (g/t)	Ag (g/t)
4834	7.3	0.3	116
4844	3	1.3	137
4884	3	<0.01	164
4944	2.25	0.4	127
4953	20.8	0.6	108
4962	4.35	0.8	83
4970	6.8	0.2	60
4980	12.9	1.3	199
4992	6.25	8.7	179
5036	12.3	3.0	154
5046	4.1	1.3	105
5052	7.9	5.2	179
5070	4.3	1.4	109
5076	2.6	1.4	46
5086	7	4.1	163
5110	4.9	1.2	316
5117	6	0.2	125
5140	11.2	0.5	109
5165	9.5	0.1	82

The company is very encouraged by these results as it supports the potential to discover bulk tonnage disseminated silver/gold mineralization this property. Two adits, about 40 metres vertically apart, were reconditioned and 110 channel samples ranging in length from 1.05m to 2.6m have been taken. Results are expected soon.

The qualified person for the La Trini project, David Henstridge, a Fellow of the Australian Institute of Mining and Metallurgy and a Member of the Australian Institute of Geoscientists, has visited the La Trini project area to see the sample sites and verified the contents of this news release.

On behalf of the Board,

"David Henstridge"

David Henstridge, President & CEO
