TUMI ANNOUNCES EL COLORADO DRILL RESULTS, MEXICO

Vancouver, Canada - Tumi Resources Limited (the "Company") (TSXv - TM; Pinksheets - TUMIF; Frankfurt - TUY). Mr. David Henstridge, President, announces the results of an initial reverse circulation (RC) drill program on the Company's 100 per cent owned El Colorado property, Sonora, Mexico. Five holes totaling 762m were drilled testing four separate areas noted for intense hematite alteration and anomalous silver values in soils.

The results of the drill program were generally not encouraging. Individual 2m samples ranged from trace amounts up to 28 g/t Ag, and the accessory elements (As, Pb, Zn) approximated the results obtained in the soil samples as well.

No further work is planned on El Colorado at this time; the Company is seeking other gold-silver properties of merit in Sonora and elsewhere in Mexico.

The qualified person for Tumi's projects, David Henstridge, a Fellow of the Australasian Institute of Mining and Metallurgy and a Member of the Australian Institute of Geoscientists visited the drill program at the El Colorado project in Sonora, Mexico, and has verified the contents of this news release.

On behalf of the Board,

"David Henstridge"
David Henstridge, President & CEO
